---

The Architectural Inventory for the City of Pittsburgh, Allegheny County, Pennsylvania, was made possible with funding provided by the Pennsylvania State Historic Preservation Office (PA SHPO), the City of Pittsburgh, and the U.S. Department of the Interior National Park Service Certified Local Government program.

The contents and opinions contained in this document do not necessarily reflect the views or policies of the Department of the Interior. This program receives federal financial assistance for identification and protection of historic properties. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, as amended, the U.S. Department of the Interior prohibits discrimination on the basis of race, color, national origin, disability, or age in its federally assisted programs. If you believe you have been discriminated against in any program, activity, or facility as described above, or if you desire further information, please write to: Office of Equal Opportunity, National Park Service; 1849 C Street N.W.; Washington, D.C. 20240.

## Abstract

This architectural inventory for the City of Pittsburgh (Planning Sector 12: Larimer Neighborhood) is in partial fulfillment of Preserve Policy 1.2, to **Identify and Designate Additional Historic Structures, Districts, Sites, and Objects** (*City of Pittsburgh Cultural Heritage Plan, 2012*). This project is the third phase of a larger undertaking which aims to ultimately complete the architectural survey for all of Pittsburgh's Planning Sectors. The scope of this project provided for the partial completion of Planning Sector 12, including the entirety of the Larimer Neighborhood.

This *Report of Findings and Recommendations* presents survey results and recommendations. Recommendations pertain to 1) the eligibility of various resources for National Register listing; 2) the use of survey data by the City of Pittsburgh; 3) resources prioritized for intensive level survey; and 4) a review of this survey effort's methodology, with emphasis on lessons learned and recommended modifications for future surveys.

All previously surveyed resources within Larimer were field checked and an updated survey record was prepared. Project historians examined the entirety of the Larimer neighborhood and collected data for all parcels for which City GIS database address data points exist. Parcels that lacked address data were largely undeveloped and wooded hillside parcels.

Project historians surveyed the following resources:

### PREVIOUSLY SURVEYED

- 41 Previously Surveyed Extant Resources
- 30 Previously Surveyed Resources – Now Demolished
  - 2 Previously Surveyed Demolished Resources — replaced with new buildings post-1975
  - 2 Previously Surveyed Demolished Resources—replaced with parking lots
- **71** **TOTAL** Previously Surveyed Properties *Resurveyed*

### NEWLY SURVEYED

- 1,650 **TOTAL** Newly Surveyed Resources

### TOTAL SURVEYED

- 1,721 **TOTAL** Resources

## ELIGIBILITY RECOMMENDATIONS

- 12 Previously Surveyed Parcels – Potentially Individually Eligible for National Register
  - 2 Newly Surveyed Parcels – Potentially Individually Eligible
- 
- **14 Potentially Eligible Resources** Recommended for Intensive Level Survey

In addition to the 14 resources recommended potentially individually eligible for the National Register, the Larimer neighborhood also contains two properties listed in the National Register and two properties that the Pennsylvania State Historic Preservation Office (PA SHPO) has determined eligible for listing in the National Register. Listed properties include Lincoln Elementary School and the former Larimer Public School; eligible properties include the Larimer Avenue Bridge and the Lincoln Avenue Bridge.

This project was administered by the City of Pittsburgh with support from PA SHPO staff. Professionals who designed this project, conducted the fieldwork, and wrote the report meet the *Secretary of the Interior's Standards and Guidelines for Professional Qualifications Standards* (36CFR61) for history and/or architectural history. Consulting firms include Michael Baker International, Inc., Clio Consulting, and Cosmos Technologies, Inc.

This project was funded in part by a Pennsylvania Historical and Museum Commission Certified Local Government (CLG) grant, the program guidelines of which can be found at [http://www.portal.state.pa.us/portal/server.pt/community/grants/3794/certified\\_local\\_government\\_grant\\_program/417950](http://www.portal.state.pa.us/portal/server.pt/community/grants/3794/certified_local_government_grant_program/417950).

## Introduction

In 2013, the City of Pittsburgh received a Pennsylvania Historical and Museum Commission Certified Local Government (CLG) grant for partial funding of an architectural inventory of Pittsburgh neighborhoods. The first phase of the Pittsburgh Architectural Inventory focused on the Troy Hill Neighborhood and was completed in October 2014. The second phase focused on the Spring Garden and Spring Hill-City View neighborhoods and was completed in February 2015. The present survey (phase three of the Pittsburgh Architectural Inventory) focuses on the Planning Sector 12 neighborhood of Larimer. The survey was conducted in July 2016, and the report was compiled in September 2016.

The City of Pittsburgh is divided into 16 planning sectors. Each sector contains a number of neighborhoods and is delineated based on a number of factors, including neighborhood and ward boundaries and topographical features. The City chose to focus the third phase of its architectural inventory on the Upper East End neighborhood of Larimer because of the extensive demolitions that have occurred there in recent years, and the present survey effort is part of the mitigation effort sponsored by the Urban Redevelopment Authority of Pittsburgh for redevelopment projects it is presently undertaking in Larimer. After two weeks of survey work, project historians had surveyed 1,721 resources, of which 1,650 were newly surveyed and 71 were previously surveyed (Figures 1-2, Appendix B). All pre-1976 properties with medium or high integrity were recorded using the PA SHPO minimum survey requirements (see Appendix A). Survey data were uploaded in real time to the City's Geographic Information Systems (GIS) database via tablet computers. These data were later re-formatted and transmitted to PA SHPO in a Microsoft Excel file in accordance with PA SHPO's Cultural Resource Geographic Information System (CRGIS) requirements.

This *Report of Findings and Recommendations* presents survey results and recommendations. Recommendations pertain to 1) the eligibility of various resources for National Register listing; 2) the use of survey data by the City of Pittsburgh; 3) resources prioritized for intensive level survey; and 4) a review of this survey effort's methodology, with emphasis on lessons learned and recommended modifications for future surveys.

### **Qualifications**

Professionals who designed this project, conducted the fieldwork, and wrote the report meet the *Secretary of the Interior's Standards and Guidelines for Professional Qualifications Standards* (36CFR61) for history and/or architectural history. Project historians included Jesse A. Belfast, of Michael Baker International, Inc., and Angelique Bamberg of Clio Consulting. Project maps and data tables were compiled by Suraj Shrestha, E.I.T., of Cosmos Technologies, Inc.

## Goals and Objectives

In 2012, the City of Pittsburgh Department of City Planning released its Cultural Heritage Plan as a component of its first comprehensive plan. Resulting from the plan, the need to document was identified with the goal to:

**Document the City’s cultural and historic resources in ways that are accurate, meaningful, comprehensive, and useful to the City and the general public.**

The Cultural Heritage Plan noted that the Historic Resources Inventory should be a “dynamic, comprehensive list of the City’s historic resources.” Further, according to the plan, the existing inventory of historic resources (over 13,500 parcels identified as being historic on some level) “needs to be field checked and continually updated as physical conditions change and additional resources are listed in the National Register of Historic Places or designated under the City’s Historic Preservation Ordinance” (Cultural Heritage Plan, 112).

To realize these goals, the City prepared policies with corresponding action items in the historic preservation plan. This current field survey is in partial fulfillment of those items, including:

### **PRESERVE POLICY 1.2 - Identify and Designate Additional Historic Structures, Districts, Sites, and Objects**

**PRESERVE 1.2-A:** Conduct a Citywide Reconnaissance Survey (cursory visual inspection).

Identify areas that are potentially eligible for new listings as City-Designated Historic Districts and National Register Historic Districts. Focus on areas that:

- Have been previously identified as potentially eligible (see Cultural Heritage Plan Appendix B).
- Have a high percentage of structurally-sound and architecturally significant pre-1940 buildings.

Identify individual structures and sites outside of City-Designated and National Register historic districts that are potentially eligible for individual nomination as a City-Designated historic resource and/or for listing in the National Register of Historic Places. Focus on structurally-sound resources that:

- Would not otherwise be part of an eligible historic district.
- Are significant or unique for their architecture and/or engineering.
- Would severely and adversely impact the neighborhood's form, character, or economic growth potential if demolished or negatively altered. (Consider existing and former

schools, religious buildings, and civic or quasi-civic spaces such as libraries, parks, fire stations, community centers, etc.).

Therefore, this current survey effort represents the City's second effort to identify previously unsurveyed historic resources within Sector 12's Larimer neighborhood, in partial fulfillment of the above-mentioned goal. In addition, the City intends to use this project to further develop and refine the methodology for conducting architectural surveys that was used in the first and second phases of the Pittsburgh Architectural Inventory (October 2014/February 2015).

## Methodology

### ***Background Research***

Prior to initiating fieldwork, the project team conducted background research and reviewed published literature to identify and obtain sources of information pertinent to the history and architecture of the Larimer neighborhood. A review of existing Pittsburgh history texts helped to predict the types of properties that should be expected in the survey area; historic mapping illustrated patterns of development and periods of growth in the neighborhoods.

### ***Reconnaissance Survey***

The survey consultants, in consultation with the City and PA SHPO, determined that scattered properties should be surveyed that were of historic age (pre-1976) and retained enough integrity to be considered a “contributor” to a potential district (i.e. medium level of integrity or higher), in an effort to understand the overall character of a neighborhood. It was also decided that in areas that could potentially be eligible for listing in the National Register as districts, a building-by-building survey would still be necessary. If building parcels were not old enough, vacant, or had no integrity, then the surveyor could check the respective box on the tablet indicating why the PA SHPO minimum requirements were not filled in for that resource. For buildings with low integrity, a photograph was taken and only the data field for current use was completed. All non-vacant parcels (i.e. those with buildings, structures, or landscape features such as parking lots or gardens) were photographed regardless of integrity because it required minimal effort when the surveyor was entering information on integrity anyway; moreover the photographs enabled project historians to review the condition and integrity assessments after the fieldwork was completed in order to assure consistency in integrity assessments among surveyors. Such additional photographic data provide an overall view of an area’s integrity and the nature of intrusions in a potential historic district. In the future, this photographic documentation will provide a complete snapshot of a particular area and be a rich source of archival data to document change over time in Pittsburgh’s neighborhoods.

The survey team consisted of two architectural historians who spent approximately two weeks in the field with tablet computers. The tablets were pre-programmed with county property parcel maps and a fillable database of attribute fields developed by the project team to satisfy CRGIS database requirements (see Appendix A).

The number of hours allotted for fieldwork allowed the survey team to conduct a complete building-by-building survey of the Larimer neighborhood and to field check and update all previously-identified resources located therein.

Members of the survey team found it critical to establish consistency in the use of certain fields at the beginning of the survey. Use of the following fields is explained:

- Potential Individual Eligibility: “Yes” was entered for all properties which had been identified as significant or potentially significant in any previous survey. Surveyors also entered “Yes” for a select few properties discovered through background research to have been significant in the historical context of the community (e.g. Our Lady Help of Christians Roman Catholic Church) and for properties whose architecture stood out (e.g. 621 Thompson Street and 121 Shetland Street), suggesting that further research on their history was warranted.
- Potential District Eligibility: Because of the extensive demolition in Larimer, the project team determined prior to the field survey that the neighborhood has a whole did not have sufficient integrity to qualify as a historic district. However, during the field survey, the project team sought to identify smaller divisions of the neighborhood or groups of related resources with sufficient integrity for historic district potential. Analysis of potential district boundaries was done after the field survey was completed and integrity maps of the surveyed areas had been generated. Therefore, use of the Potential District Eligibility field was not used to identify resources that might contribute to a neighborhood-wide district. Instead this field was marked “Yes” only for smaller groupings of historic resources that were deemed in the field to have potential historic or architectural significance. Entering “No” in the potential district eligibility field was done for all resources with low integrity (unless special circumstances applied, e.g. a property with low integrity that was obviously a part of a related row or group, whose original characteristics could be gleaned from better-intact examples). For resources with medium and high integrity, the use of “No” in the potential district field was reserved for resources outside of a potential district’s likely period of significance.
- Integrity: For this field, broad categories of “High,” “Medium,” and “Low” were utilized. Resources in the survey area were judged to have some integrity if, despite some alterations, their original character was discernable. A property which had artificial siding but all original trim, windows, and doors intact might be given a rating of “High.” “Medium” was assigned to those which exhibited artificial siding and replacement windows and/or doors, but which retained their original size, scale, rhythm and proportion of openings, and possibly some original ornamentation. “Low” was used for properties with drastically altered facades and/or massing, such that their original character had been obscured.
- Style: Correspondingly, where a resource’s original style was evident in its massing, extant detail (such as brackets), and/or characteristic feature (such as mansard roof), that style was entered in this field. Resources with low integrity, where no such clue as to original style remained, were assigned a value of “No Style,” even if context suggested a specific era of construction.

- Vacant parcels and properties constructed post-1975 were noted with a “Yes” in those fields. Additional fields and photographs were not taken for vacant properties. For post-1975 properties, photographs were taken and the current function was recorded. Parcels that were not occupied by a structure but that were in use (such as parking lots, parks, and gardens), were not defined as “vacant,” but entered as “sites” and assigned a relevant function from the CRGIS-supplied drop-down list; such sites were also photographed.
- The “Year Built” fields were entered in the field and were estimated based on materials, method of construction, style, and context.
- The “Comments” field was used by surveyors to record any additional features of note and for noting grouped resources (i.e. double houses, blocks of identical row houses, or resources that are otherwise historically related). Project historians also used the Comments field to note local property types deemed to be of special interest.

### ***Database Management***

Once the reconnaissance survey was complete, the City GIS department uploaded the results from the platform software to Microsoft Excel. Spreadsheet data were reviewed for accuracy and completeness. PA SHPO Key Numbers and Inventory ID numbers were manually entered for all 1,721 surveyed resources. After the Excel File was complete, it was used to generate mapping (Appendix B), and tables (Appendix C). The Excel File was sent back to the City for re-upload into the City’s GIS system so that the City would have the most accurate and complete data from the survey. The GIS data concluded the deliverable for the City to incorporate into its Historic Resources Inventory.

PA SHPO required a slightly modified spreadsheet to update its CRGIS database. A copy of the City’s database spreadsheet was modified by removing irrelevant data fields, by reformatting column headings to use CRGIS naming conventions, and by adding primary (i.e. common) Inventory ID records for grouped resources that share a key number. Typical examples of grouped resources are a block of identical row houses, a double house, or a complex of industrial buildings. Information included in the primary record for the resource group included such fields as an address range, architectural styles, and materials. For grouped resources, the primary Inventory ID number consists of the CRGIS Key Number plus the suffix .0001, and related resources are numbered sequentially beginning with the suffix .0002. Thus, for a grouped resource with Key Number 123456, the primary record’s Inventory ID would be 123456.0001 and the first related resource’s Inventory ID would be 123456.0002.

## Historical Context/Background History

The neighborhood of Larimer is situated six miles east of downtown Pittsburgh in Planning Sector 12, Upper East End. It occupies a plateau above Negley Run to the north and Washington Boulevard to the east; these valleys provide natural boundaries between Larimer and neighboring communities of Highland Park and Lincoln-Lemington. East Liberty Boulevard provides the boundary between Larimer and East Liberty to the west, and Penn Avenue is the border between Larimer and Shadyside to the south.

The neighborhood is named for William Larimer, a man of French-Scottish descent who grew up in Westmoreland County and made a fortune in the railroad industry in Pittsburgh before moving west to become a land developer in the Colorado Territory. While in Pittsburgh during the first half of the nineteenth century, Larimer built a country house along a path, Larimer Lane, that became Larimer Avenue. No sign of the Larimer house remains today.

Another early resident of the area was George Finley, who had a farm including a lake, Silver Lake, and an ice house between Lincoln and Frankstown avenues in the 1870s (and possibly earlier). Finley's property included both sides of what is now Washington Boulevard to approximately the alignment of Xenia Way. In 1882, Finley published a book on how to maintain an artificial lake fishery based on his experience (*Living Waters of Larimer*, 2). The Finley family sold the farm in 1900, and the Pittsburgh Hospital (with additions, now the Forbes Center for Rehabilitation and Healthcare) was constructed on the southern portion. Silver Lake was filled in by 1939 and the site was occupied by a drive-in theater during the 1950s and 60s. Historic map analysis does not support the 1992 Pittsburgh Register of Historic Places contention that the brick house at 117 Finley Street was the Finley farmhouse.

Larimer's flat land made it attractive for farming, industry, commerce, and residential development, but since it was not convenient to the river for transportation, Larimer only began to develop rapidly as a neighborhood after the construction of the Pennsylvania Railroad connecting Pittsburgh and Philadelphia. East Liberty Station was established in 1851. Germans were the first immigrant group to arrive and built Saints Peter and Paul Church between 1857 and 1859 along Larimer Avenue. The original church was demolished in the late 1880s as a result of damage sustained during work on the avenue; a new, larger church with distinctive twin spires was constructed for the growing congregation in 1890. Partially destroyed by lightning in 1909, it was rebuilt in 1910 and remodeled in 1916 (Catholic Diocese of Pittsburgh). The church complex grew to also include a convent and a school by the turn of the twentieth century; the abandoned church and school buildings remain, just across East Liberty Boulevard, the present boundary between the Larimer and East Liberty neighborhoods.

In the 1890s, Larimer began to be settled by Italian immigrants. The first arrivals were from other parts of the city, predominantly downtown and the lower Hill District, but as Larimer's Italian population grew and established its own institutions in the neighborhood, more immigrants began to arrive directly from Italy. Larimer's Italians came from various regions and villages. Northern Italian merchants, clerks, and skilled workers formed an upper class, while immigrants from southern Italy's peasant class applied their trades in bricklaying, stonecutting, cobbling, or barbering, or found work in the steel mills, with the

railroad, or with the East End Gas Company founded in the valley between Lincoln and Larimer avenues in 1868. After 1905, the City of Pittsburgh's construction of a water treatment facility across the Allegheny River from Larimer attracted many Italian employees (Battista).

Pittsburgh Italians also resided in the Hill District, Bloomfield, the Strip District, and the North Side, but during the city's heyday of European immigration (roughly 1890-1920), Larimer was the largest Italian neighborhood and the most prosperous. A 1920 master's thesis on Italian settlement in Pittsburgh included the following description:

East of East Liberty, spreading out on either side of Larimer Avenue, is the largest [Italian] colony, numbering from 7000 to 8000. This neighborhood has its Italian restaurant and its Italian merchants; its doctors, interpreters, churches and schools.... In possessing both a large business district and a still larger residence district, almost entirely Italian, the neighborhood is more distinctly an Italian colony than any other settlement in the city. It is a unit in itself." (Myer, 10)

By 1930, 70 percent of the population of East Liberty and Larimer together was Italian (Bodnar, Simon, and Weber, 210). Larimer's development as an Italian-American community leveled off after the passage of the Emergency Quota Act of 1921 and the John Reed Act of 1924, which tightly restricted foreign immigration to the United States. From about 1900 to the early 1950's, Larimer functioned both as an Italian-American village and as a sort of suburb to adjacent East Liberty.

In her thesis, Ella Burns Myer also noted the differences between housing in Larimer and in other Italian neighborhoods, such as Bloomfield: in contrast to Bloomfield's rowhouses, which lacked front yards or even front porches, Larimer's single-family dwellings were more spaciouly situated. A memoir of life in Larimer in the early years of the twentieth century recalls, "Most dwelling houses [in Larimer] had sufficient available ground to cultivate a garden and grow the popular kitchen vegetables.... Some families of Little Italy had a horse or two stabled in the rear of their property" (Halterlein, 28). Moreover, in Larimer, rates of homeownership were higher (Myer, 13).

In the early twentieth century, Larimer's Italian immigrants established businesses and institutions which maintained and reinforced their Italian traditions and identities. Among the earliest and most prominent was Our Lady, Help of Christians, the first Italian Catholic Church in Pittsburgh, dedicated on April 17, 1898 at 6513 Meadow Street. In 1905, the church burned, and the current building was completed in 1906. Outreach into Larimer's Italian community by the venerable East Liberty Presbyterian Church resulted in enough conversions to found the First Italian Presbyterian Church (later called Trinity Presbyterian Church) at Larimer Avenue and Mayflower Street in 1903. Sermons at both churches were held in Italian. Both churches still stand.

Over 25 mutual aid societies and fraternal organizations existed in Larimer at its peak. While some were mainly social in nature, others provided important services to their members, such as financial services or sick and death benefits; in this regard, the societies functioned as insurance companies. Some clubs, such as the large and influential Caserta, Trento, and Trieste, admitted all foreign and American-born Italians,

while others restricted membership to immigrants from specific villages and their descendants. Three Sons of Columbus lodges also served the Larimer neighborhood, two for men and one for women. The national headquarters of the Sons of Columbus was even located on Larimer Avenue, but it has been demolished (Battista).

Many of these fraternal societies held their meetings at the Kingsley House. A settlement house founded to support immigrants in the Hill District in 1893. Kingsley House moved to the corner of Larimer Avenue and Auburn Street in 1919 and constructed a permanent facility with a gym, swimming pool, and classrooms in 1923. This building has been demolished, although the institution still exists in a new building at 6435 Frankstown Avenue.

Larimer Avenue was the neighborhood's main commercial thoroughfare and home to many businesses that provided Italian-Americans with goods and services related to their traditional culture: grocers, bakers, barbers, cobblers, tailors, pharmacies, and funeral homes. The Meadow Grill at the corner of Meadow Street and Larimer Avenue served Italian cuisine to a clientele from around the East End, and Turp's Pizza Shop was the first in the city to serve this Italian specialty (Battista). Larimer's early German character persisted in Kreuer's Cafe at 507 Larimer Avenue, which was also frequented by Italians (Ciotola, 82). An auditorium and dance pavilion, the Bryn Mawr, was located on the north side of Larimer Avenue at the end of Auburn Street. Paulson (originally Park), Lincoln, and Frankstown avenues also contained a mixture of businesses and residences. Hamilton Avenue, just a block from the railroad, had a more industrial character.

Two public elementary schools, the Larimer Avenue School (1896, 1904, 1931, formerly called Lincoln School) and Lincoln Elementary School (1931) were built on Larimer and Frankstown avenues, respectively. Both are listed in the National Register of Historic Places, and Lincoln School is designated as a City Historic Landmark. All but the auditorium of the Larimer Avenue School dates from the era before a unified city school district was formed in 1911; during this period, each ward raised funds and hired an architect to construct its own public school. The Larimer Avenue School is one of the largest and most elaborate of the city's stock of school buildings from this era, and its design reflects the Italian heritage of the population it served. A clock tower, added to the school in 1904, resembled an Italian campanile but was demolished in 1958. In 1931, the Larimer School received an Art Deco auditorium addition. The Lincoln School was built in the same year to the design of Thomas Pringle and Oliver Robling, introducing an Art Deco vocabulary to the Pittsburgh Public Schools that was to characterize their design for the next decade. (Bamberg, 2)

Between 1906 and 1911, the city constructed three bridges, the Lincoln Avenue Bridge (1906), Larimer Avenue Bridge (1910), and the Meadow Street Bridge (1911), in a Progressive-Era campaign to eliminate barriers between neighborhoods. Despite the Pittsburgh region's specialty in steel, the Lincoln Avenue Bridge was built of stone, and reinforced concrete was chosen for the Larimer and Meadow Street bridges to save on maintenance over time. The Larimer Avenue Bridge was the longest concrete span in the world when it was completed in 1910. Though the Larimer Avenue Bridge has been stripped of its ornamental railings and custom made green granite and bronze light fixtures (designed by Stanley L. Roush) that were

installed above the main span piers, the bridge remains significant today as an early example of reinforced concrete arch bridge construction (Living Waters of Larimer, 2)

Below the Meadow Street Bridge, Chianti Way was a dirt street whose name reflected the Italian heritage of its residents. City steps connected the upper part of the neighborhood to Chianti Way and the community known as Basso La Vallone, or “down in the hollow.” Here, residents cultivated fruits and vegetables, cleared the hillsides to plant small vineyards, and even raised livestock (Battista). Chianti Way was originally known as River Street and renamed after the product of the Italians’ vineyards in the 1910s. It was filled in and removed when the Negley Run valley was regraded for Negley Run Boulevard during the 1950s, but the city stairs that led to it—now abandoned—still exist near Meadow and Lenora streets.

Larimer also included an African American community along Frankstown and Lincoln avenues. Racial integration was another key difference between Larimer and Bloomfield: the former was integrated, while the latter was not. Bodnar, Simon, and Weber note that the integration of Pittsburgh’s African American and Italian populations in the East End, Strip District, and Lower Hill began in the 1890s and continued through the early twentieth century. One-fifth of “the Larimer section of East Liberty” was African American in 1930 (Bodnar, et. al., 210). However, racial discrimination existed in Larimer and worsened after about 1930. For example, the Kingsley Association settlement house excluded African Americans from its facilities and programs (Bodnar, et. al., 215).

Less is recorded about Larimer’s early twentieth century African American population than about its Italians, but two churches associated with significant African American congregations are extant from this period, which recall the religious and social lives of this community. Mount Ararat Baptist Church, was built in 1928 at 275 Paulson Avenue, and is among the early African American churches in the East End; the congregation was formed in 1906. The St. James AME Church congregation, formerly known as East Liberty Mission, was formed in 1886 and occupied several East End locations before purchasing its current building in the 1960s. The St. James AME church building at 444 Lincoln Avenue was constructed by the Lincoln Avenue Methodist Episcopal Church, which was active from 1893 until 1960. African American businesses tended to be located on Lincoln or Frankstown avenues, while Larimer Avenue had a distinctly Italian character. Other African American institutions in the neighborhood, the FROGS Club at 532 Paulson Avenue and the Omega Psi Phi Fraternity Center at 123 Meadow Street, arrived later. The FROGS (“Friendly Rivalry Often Generates Success”), a society of professional African American men, was founded in 1910 but did not purchase the former funeral home at 532 Paulson Avenue until the late 1980s. The Omega Psi Phi service fraternity purchased the property at 123 Meadow Street in 1991.

A number of factors contributed to Larimer’s decline after 1950. After World War II, the desire for a suburban lifestyle drew many second-generation Italian-Americans to relocate to nearby Penn Hills or Plum. An influx of African Americans displaced by urban renewal in the Lower Hill District sought housing in Larimer during the 1950s and 60s, but race relations by then had deteriorated to the point where members of both groups sold homes to avoid becoming neighbors with the other (Bodnar, et. al., 216). Because white Italian-Americans had more options of where to move, Larimer lost Italian residents and became more heavily black. Finally, when urban renewal came to East Liberty in the 1960s, it disrupted

the commercial, religious, and transit patterns of Larimer's remaining middle-class Italian-American residents, many of whom moved away.

The City of Pittsburgh's Cultural Heritage Plan notes, "The Upper East End is a dense residential and commercial sector with several major business corridors. Sector 12 is rich in historic resources and there are many opportunities to combine historic preservation efforts with new complementary infill construction." Of Larimer specifically, the report states, "Larimer was once home to many Italian and German immigrants who built modest brick homes with small yards. There are a number of mixed uses and vacant lots in the neighborhood that present opportunities for new investment. The Larimer Vision Plan (2008) calls for the neighborhood to transition into a state-of-the-art green community" (83).

Two buildings in the neighborhood, Larimer School and Lincoln School, are listed in National Register of Historic Places. Lincoln School and a ca. 1870 house, 141 Mayflower Street, are City-Designated Historic Structures.

The Pittsburgh Register of Historic Places, a historic resources survey conducted by the Historic Preservation Office of the Department of City Planning in 1992, identified no potential historic districts in Larimer and the following individually significant buildings, structures, and sites (some of which have since been demolished):

117 Finley Street  
328 Frankstown Avenue(Lincoln School)  
6707-11 Frankstown Avenue(demolished)  
Frankstown Avenue & Finley Street (Forbes Health System)  
336 Ladson Street  
Larimer Avenue at Winslow Street (Larimer School)  
Larimer Avenue over Washington Boulevard (Larimer Avenue Bridge)  
639-43 Lenora Street  
420 Lincoln Avenue (demolished)  
426 Lincoln Avenue (demolished)  
444 Lincoln Avenue (St. James AME Church)  
600 Lincoln Avenue  
610 Lincoln Avenue  
639 Lincoln Avenue (greater Pittsburgh Elks 115)  
Lincoln Avenue over Washington Boulevard (Lincoln Avenue Bridge)  
513 Lowell Street  
141 Mayflower Street

## Results

### ***Summary of Findings***

The entirety of the Larimer neighborhood was surveyed during this effort, including vacant parcels. Larimer has been heavily affected by disinvestment and demolition, with almost half (49%) of its tax parcels consisting of vacant lots. Virtually every block is impacted; several have more vacant lots than buildings, and some have no buildings remaining at all. Little of Larimer's historic character as Pittsburgh's most populous and vibrant Little Italy is evident.

By far, most of the resources that do still exist in Larimer are residences. These are predominantly single-family houses dating from the decades immediately before and after the turn of the 20th century, with a few notable earlier examples. Even the historically commercial streets of Larimer Avenue, Frankstown Avenue, and Washington Boulevard have always included residential buildings, and still do. Only the neighborhood's light industrial areas on Hamilton Avenue and the southernmost block of Auburn Street are not interspersed with houses; these are also the densest areas of the neighborhood with the fewest vacant lots. The historic Italian commercial character of Larimer Avenue and African American commerce of Frankstown Avenue have been all but completely lost to demolition and vacancy. Civic and religious life are represented by several public and parochial schools and churches dotted throughout the neighborhood.

Among the resources from Larimer's peak historic period of development (about 1890-1940) still extant, those with medium and low integrity are fairly evenly distributed. High integrity is rare.

National Register Listed, National Register Eligible, and potentially significant resources throughout the survey area are displayed in Appendix C, Table 2. The location of previously surveyed resources is shown in Appendix C, Table 3. Appendix C, Table 4 lists all newly surveyed resources.

### ***Types of Properties***

Larimer consists predominantly of vacant lots and detached single-family residences built during the neighborhood's peak, the period between about 1890 and 1940. Most of these houses are modest to middle-class, two- to two-and-a-half story, brick houses displaying vernacular versions of the eclectic and revival styles common during the first third of the twentieth century: Queen Anne, Colonial Revival, and Craftsman/Bungalow. A house which stands out for its materials and construction is the stone foursquare at 621 Thompson Street. This was built by stonemason G. M. Massaro, father of the founder of Massaro Corporation, for his family in the 1930s.

A few older houses in the Italianate style represent the era before Larimer's intensive development as, essentially, a streetcar suburb of East Liberty and ethnic Italian enclave. There are also a few substantial early houses, present by 1882, with distinctive Gothic Revival-Italianate transitional ornamentation. Their common L-shaped plans and similarities in window design, millwork, and other details suggest a common designer or builder. 336 Ladson Street and 600 and 610 Lincoln Avenue are the most intact of these, but

others (542 Paulson Avenue, 530 Lincoln Avenue, and 343 Ladson Street), while more altered, show evidence of having once been similar. In 1890, 610 Lincoln Avenue was owned by a member of the Heppenstall family, which ran a successful steel factory in Lawrenceville.

In addition to single-family residences, Larimer's streets are also populated with a few double houses and apartment buildings and several modest brick rows. Notable is Elmer L. Williams Square, a block-long, ca. 1920 development originally known as Farlson Square after its developer, G. L. Farrell. This consists of six Craftsman style rows and is intact with relatively good integrity.

On Larimer and Frankstown avenues, only a few small brick buildings with first-floor storefronts, mostly empty, attest to the historic commercial life of the Larimer neighborhood. In addition, a small number of corner storefronts are found among the neighborhood's residential blocks. Washington Boulevard developed later than the rest of the neighborhood, from about the 1920s to the 1960s, with more automobile-oriented commercial properties and parking lots. Two of the neighborhood's three bridges, the Larimer and Lincoln Avenue bridges, soar over this busy thoroughfare. The Meadow Street Bridge spans Negley Run. The decks of the Larimer Avenue and Meadow Street bridges are undistinguished, lined with modern concrete and chain-link barriers, but the stone Lincoln Avenue Bridge still has its Art Deco style railings, though these are not original to the structure.

Hamilton Avenue retains its historic character as a light industrial corridor with larger-scale masonry buildings, one to three stories in height. The southern end of Auburn Street, between Paulson and Lowell Avenues, also has a fairly intact industrial character. Here is located the complex associated with the last remaining Italian bakery in the neighborhood, Stagno's.

Several historic religious and institutional buildings are scattered throughout Larimer. The largest and most imposing church is the 1906 Classical Revival Our Lady Help of Christians which, along with its associated school and Franciscan convent, occupies an entire block between Meadow and Winslow Streets. This church has been vacant for over 20 years and suffers from considerable damage and deterioration; however, the parochial school and convent buildings are being renovated. Several other churches in the neighborhood date from ca. 1900 to ca. 1960. The house at 537 Paulson Avenue is currently used as a mosque. The neighborhood has two historic public schools, the 1930s Art Deco Lincoln School on Frankstown Avenue, which is still maintained as an operating public school, and the Renaissance Revival Larimer School of 1896 and its additions (1904 and 1931). The latter are vacant and in advanced states of deterioration. A ca. 1900 hospital stands, with additions, on a portion of the former Finley Farm between Frankstown Avenue, Washington Boulevard, Shetland Street, and Finley Street.

Historically, Larimer had no parks or cemeteries and therefore little open space aside from the steep hillsides at its edges. An exception is the lot opposite Larimer School between Larimer Avenue and Lenora Street (originally occupied by the large 1860s-era suburban home of Joseph Laurent), which was purchased by the City, demolished, and converted to a school playground by the 1920s. Today, there is a great deal of open space in the form of vacant lots. Some of these are being maintained and utilized as gardens or informal parks, but most are overgrown with weeds.

Little was built in Larimer after about 1950. Hamilton-Larimer, a ca. 1960 low-rise public housing complex at the northern end of Auburn Street, represents the urban renewal era of public investment in Larimer. Brand-new infill housing units on and near Larimer Avenue are evidence of the implementation of the 2010 Larimer Vision Plan, a strategy for creating a green community of energy-efficient housing, urban farms, and recreational greenways.

### ***Integrity and Condition***

The overall integrity of the Larimer neighborhood has been severely compromised by extensive demolition resulting in a prevalence of vacant lots. As a result, Larimer retains virtually no integrity of feeling and association as an enclave strongly identified with Italian-American and, to a lesser extent, African-American culture in the pre-WWII years. While many of the neighborhood's religious and civic institutions still stand, some are long-abandoned and in extremely tenuous condition, and its commercial areas are profoundly affected by demolition and vacancy.

Among the resources that remain, integrity of materials, design, and workmanship are moderate. Most properties have been altered in some way, most prevalently through the installation of artificial siding and/or the alteration of original openings and/or porches. The era of most of these alterations appears to be ca. 1940-1980 with many resources also evincing deterioration and deferred maintenance. Individual resources whose original materials, design, and workmanship have been maintained or restored are rare.

## Recommendations & Conclusions

Because this survey was designed to serve both the City of Pittsburgh and the PA SHPO, recommendations have been formulated for potential National Register eligibility evaluations and for the use of survey data under the City of Pittsburgh's historic preservation ordinance. We also bear in mind that successful historic preservation may take place independent of formal designation. Other recommendations pertain to properties meriting intensive level study, and the overall methodology of this survey effort, in general.

### ***Eligibility of Resources for National Register and City Listing***

The National Park Service defines a district as a type of resource that “possesses a significant concentration, linkage, or continuity of sites, buildings, structures, or objects united historically or aesthetically by plan or physical development” (*National Register Bulletin: How to Apply the National Register Criteria for Evaluation*, 2002). The findings of this survey indicate that these qualities are not present in Larimer due to the extent of demolition in the neighborhood. Neither the neighborhood as a whole nor any subsection of it demonstrates the combination of significance and integrity required for eligibility as a National Register Historic District. For the same reasons, we do not recommend pursuing the designation of Larimer as a City Historic District. These observations are consistent with previous studies, such as the City's 1992 “Pittsburgh Register of Historic Places” survey and 2012 Cultural Heritage Plan, none of which have recommended the establishment of a historic district in Larimer.

### ***Intensive Level Survey Recommendations***

Fourteen of the resources listed in Appendix C, Table 2, as “Potential Individually Eligible Resources,” are recommended for further study or intensive-level survey. Based on appearance and available background information, these resources have the potential to be eligible for listing in the National Register of Historic Places and/or as individually-designated City Historic Landmarks.

- 1. Recommend resources identified in Table 2, as “Potential Individually Eligible Resources” for Intensive-Level survey.***
- 2. Recommend resources identified in Table 2, as “Potential Individually Eligible Resources,” with pre-existing Intensive-Level documentation, to be determined eligible for listing in the National Register of Historic Places.***

### ***Preservation of Historic Resources as a Sustainable Strategy***

In the absence of a potential historic district or districts, we have considered other approaches to the stabilization and conservation of historic fabric in light of the “Opportunities” identified for Larimer in the Pittsburgh Cultural Heritage Plan. These are:

- Promote the Italian, German, Polish, and Irish ethnic influences that contribute to the character of many of Sector 12's neighborhoods;
- Attract continued investment to East Liberty, Garfield, and Larimer that complements the traditional pattern, form, and density of [their] traditional neighborhood character.

Regarding the first of these, there is little architectural or cultural evidence left of Larimer's historic ethnic character outside of a few singular resources. However, if those important individual landmarks are able to be preserved, they will be important links to Larimer's past.

Regarding the second, we see opportunities for the preservation of Larimer's remaining historic fabric within the context of the Larimer Vision Plan, which already has the support of the City and the community. This plan does not specifically identify the preservation and reuse of existing buildings among its green and sustainable strategies for Larimer, noting only,

"The study area has numerous impressive historic structures, such as the former churches on Larimer and Meadow and the old Larimer School. Many of these structures are in disrepair and in some cases dangerous or near collapse; rehabilitation will be costly or complex. Where creative reuse of historic structures is feasible it should be pursued right away, but where it is not, they should be taken down and the building materials and contents reused and recycled (deconstructed). The community needs to be strategic about what to save and what to deconstruct." (33)

Beyond this, we recommend that the preservation and rehabilitation of the neighborhood's existing sound building stock be promoted as a broader strategy to contribute to Larimer's reinvention as a model sustainable community. The overlap between low-impact, environmentally-friendly development practices and historic preservation is increasingly understood, especially in older communities such as Pittsburgh. Historic preservation and adaptive reuse conserve the energy and materials that have already been expended in the construction of existing buildings, creating a savings in the manufacture, purchase, transportation, and assembly of new materials. Moreover, in pre-war buildings that remain in stable condition, the quality of materials, construction, and craftsmanship frequently cannot be matched by modern building products and practices. Therefore, the preservation of Larimer's remaining quality historic building stock can contribute to its overall value as a revitalized, sustainable community and provide broader choices for present and future residents and business owners.

***1. Promote historic preservation and adaptive reuse of existing, high-quality buildings as part of the overall sustainable renewal plan for Larimer.***

### ***Use of Survey Data by City of Pittsburgh***

Eligibility for the National Register is not determinative of eligibility for City historic designation. Moreover, it is not the policy or practice of the City of Pittsburgh to initiate nominations for city historic designation (or, presumably, future Neighborhood Conservation District designation), but rather to

evaluate and act upon nominations submitted by community members, organizations, and leaders. Therefore, recommendations for use of survey data by the City of Pittsburgh pertain to the Historic Review Commission's responsibilities under the City of Pittsburgh Historic Preservation Ordinance, §1101.07(b), to:

- Carry on educational activities in furtherance of the purpose of [the Historic Preservation Ordinance];
- Act in an advisory role to City departments and agencies related to preservation matters;
- Act as a catalyst to expedite the flow of projects through departments and agencies;
- Facilitate the redevelopment of historic structures and districts in accordance with approved development plans of the city;
- Act as liaison on behalf of the City with preservation organizations, professional societies, community and other groups, private property owners, and interested citizens, concerning conservation of the historic resources of the city;
- Act as a liaison on behalf of the City with the State Historic Preservation Officer, agencies of the federal government, the Advisory Council on Historic Preservation, and the National Trust for Historic Preservation, concerning the historic resources of the city;
- Prepare plans for the conservation and development of historic resources;
- Undertake or encourage and facilitate the documentation of the architecture and history of the City's historic resources.

In furtherance of these goals, it is understood that the Department of City Planning intends to fully integrate the list of Potential Individually Eligible Resources and other survey data into its Geographic Information Systems (GIS), so that it may serve as a tool in all aspects of implementing the City of Pittsburgh's comprehensive plan. As Larimer looks forward to extensive redevelopment in the coming years, this data will help City Planning staff and other City officials to plan for the preservation of the neighborhood's most intact and important individual historic resources alongside the construction of badly-needed new housing and commercial and recreational infrastructure. The preservation of these resources will provide points of reference to Larimer's history and promote continuity of the past, present, and future of its urban geography.

In the absence of regulatory historic designation, the preservation of Larimer's remaining historic fabric must rely on voluntary efforts, which can be increased by incentives to property owners. One significant incentive already in place is federal Choice Neighborhoods funding to make grants available to homeowners for needed exterior improvements to their properties. Such homeowner incentive programs, if implemented in collaboration with preservation professionals, can be adapted to support the conservation of existing historic building stock while imposing few unwanted restrictions on property

owners. Data from this survey can be utilized in this and other programs to support investment in the purchase and maintenance of properties which retain historic integrity throughout Larimer.

In order to keep Architectural Inventory survey data up to date, it is recommended that the Department of City Planning coordinate with other city and county agencies to obtain and periodically update the Architectural Inventory database with information related to building construction or demolition. For example, on a regular basis data related to building demolitions and construction could be cross referenced with data from the Bureau of Building Inspection and Allegheny County Assessor. Such interim data updates could utilize City Planning interns and would not typically require field checking.

As City Planning completes surveys of Pittsburgh neighborhoods, it is recommended that the survey data be shared with other community stakeholders and the PA SHPO to ensure its long-term preservation. An electronic database file (such as Microsoft Access) could be created with essential building attribute fields and photographs and should be saved on disk. A second file should be created in PDF format to ensure accessibility as computer programs and file compatibility change over time. Ideally, at least two paper copies of the survey data should be made. One paper copy would be kept in the City of Pittsburgh Archives and the other would be curated at a local independent archive. Possible community partners for data sharing are the Pittsburgh History and Landmarks Foundation, the Pennsylvania Department of the Carnegie Library of Pittsburgh, the Archives of Industrial Society at the University of Pittsburgh, the Architectural Archives at Carnegie Mellon University, and the archives maintained by Preservation Pittsburgh.

- 3. Recommend the Architectural Inventory survey data, which has been incorporated into the City's GIS, be utilized in planning and implementation of initiatives to stabilize and revitalize Larimer.***
- 4. It is recommended that Pittsburgh Department of City Planning develop best practices to keep the database and GIS files relevant and useful in the long term and ensure its archival stability.***

It is also recommended that the Department of City Planning, through its Historic Review Commission, Historic Preservation Planner, and relevant Neighborhood Planner, continue the practice—begun in Sector 1—of sharing survey results with the survey community in a meeting. In areas which have not traditionally had a strong culture of preservation awareness or action, including the Larimer survey area, the purpose will be to start a conversation about historic preservation in the surveyed community. In areas with established historic districts, the conversation may continue at a higher level about expansion of current preservation activities. Meetings should include a variety of stakeholders, including local community groups, preservation organizations, and residents and property owners, as well as Historic Review Commission representative(s), city officials, and PA SHPO staff. Ideally, the survey area's City Council representative would host the meeting at a location within the survey area. A typical meeting agenda might be:

- Introductory presentation about the benefits historic preservation (for “new” communities) or the accomplishments of historic preservation to date (for “experienced” communities);
- Summary overview of historic preservation tools and practices (National Register, local designation, tax credits, etc.);
- Description of survey activity and presentation of results in that neighborhood or sector;
- Discussion of how City will use data and possibilities for how the community might use it;
- Question and answer.

**5. Recommend the results of the Architectural Inventory and survey data be shared with subject neighborhoods at a neighborhood or district meeting.**

### **Methodology of the Project**

Within the confines of the current project, surveyors gathered data on 71 previously-surveyed resources and 1,650 newly surveyed resources (see Table 1, below, for estimates of survey completion; Appendix C, Table 4 for a list of newly surveyed resources).

<b>Table 1: Survey Completion</b>			
	<b>Surveyed Parcels to Date (Architectural Inventory Phases 1-3)</b>	<b># Parcels City-wide</b>	<b>% Complete City-wide</b>
Not Previously Surveyed	4,165	139,375	2.9%
Previously Surveyed	525*	13,385	3.9%
<b>Total</b>	<b>4,690*</b>	<b>152,760</b>	<b>3.1%</b>
* Previously Surveyed refers to parcels surveyed prior to the commencement of the Pittsburgh Architectural Inventory. This number excludes 53 previously surveyed resources in Sector 1 whose tax parcels have been abolished.			

The survey of Larimer is the third phase of an on-line, tablet-based data collection method piloted over two previous surveys that took place in City Planning Sector 1. Over the course of these efforts, several previously-identified issues with methodology have been resolved, while we have adapted to others which are inherent to the project. For example, the survey team in this phase agreed to save time by collecting less than a full record for resources exhibiting low integrity: only the integrity and current use fields were entered for these resources, and a photograph was taken. But the limited battery life of each tablet continued to require that the survey team be equipped with two tablets per surveyor for each 8-hour day in the field. Poor wireless coverage, which impeded our ability to save and update data in some

areas of Sector 1, was seldom a problem in Larimer, but could still affect future survey efforts in other neighborhoods.

Persistent problems with survey methodology mostly pertain to gaps between data collection in the field and its accurate representation in tables and maps, which need to be created afterward in the office.

Because mapping is generated on the basis of tax parcels, it cannot represent all the data collected in the field, for example: multiple addresses and/or multiple uses per parcel, and/or multiple uses in a single building, complex, or group of related buildings. Because this was a historic resources survey, our field recordation focused on pre-1975 buildings, but some sites contained a mixture of historic and modern-era buildings. In these cases, only the historic data are represented on the maps. A second “Use” field would allow the collection of more complete data, but would not solve the issue of overly-simplistic mapping.

Vacant lots, a significant feature of Larimer, are also imperfectly represented in the maps generated by this survey. This is because data was collected for vacant lots with addresses and tax parcel numbers, but other vacant lots have been vacant for so long that no addresses remain in the county system, or their tax parcels have been abolished. These circumstances are especially common on hillside properties, which were often the earliest to be demolished or abandoned. No effort was made to enter new data points to account for vacant properties in these cases.

The decision to record less than the full set of data for low-integrity properties also has ramifications for mapping. Maps based on characteristics such as style or date of construction will not depict these properties, since that information was not collected for them.

In this survey, a significant amount of office time continued to be devoted to manually assigning Key Numbers and Inventory Numbers to resources after the completion of field work. It is worth investigating possible methods of recording Inventory ID numbers in the field in order to minimize the amount of time spent in the office manually checking and entering data. The ideal situation would be to have all data fields completed in the field using tablets, with the exception of Historic District Potential, which would be completed in the office after integrity analysis and mapping are completed.

## Appendix A: Attribute Fields – PA SHPO Minimum Survey Requirements

### ***Attributes (parcel-by-parcel basis)***

**As per City of Pittsburgh:** Checkboxes for the following categories:

- Potentially Eligible Individual
- Potentially Eligible District
- Vacant – Not Surveyed
- Post 1975 – Not Surveyed
- Integrity LOW – Not Surveyed
- Integrity MED – Surveyed
- Integrity HIGH - Surveyed

**As per PA SHPO Minimum Record for CRGIS:**

- Historic Name, or blank if there is none
- Resource Type (NR category)
  - Building
  - Site
  - Object
  - Structure
  - District
- Tax Parcel (if there is no address) (automatically populated)
- USGS Quad, UTM Zone, and or Lat/Long.
- Address (automatically populated)
- Municipality (automatically populated)
- County (automatically populated)
- Owner (public, private, or mixed)
  - Public
  - Private
  - Mixed
- Number of resources
- Style (as per “how to complete PHRS survey form”)
  - Colonial
