

**Communication to 311 Contacts for Water Filter Distribution
Update as of June 26, 2017**

Dear Resident:

Due to an unforeseen delay in receiving our delivery of water pitchers and filters, we need to push back the dates on which the ZeroWater pitchers and filters will be available at fire stations in each region of the City. **Please see the table below for the first date of availability for your area of the City, barring any further transportation delays/issues.**

Region	Date Available to Public
North/West	June 30
East	July 5
South	July 6

A list of fire stations addresses by region is provided below for your convenience. In general, you can pick-up the water pitcher and filters you requested through the Safe Water Program website between the hours of 9:00am-7:00 pm. If the crews are responding to a call, you may need to wait a few minutes or return another time.

Please check the Safe Water Program website <http://pittsburghpa.gov/safepgh2o/> for updates on the distribution timeline and locations for those filters in the coming weeks.

As a reminder, the City has worked with ZeroWater to provide residents with coupons for discounted water pitchers and filters. The attached coupon is good through December 2018 and can be used at retail locations such as Bed, Bath & Beyond, Best Buy, Home Depot, Target, Walgreens, and Walmart. If you have already received a free pitcher, please note that there is a limit of one per household, but you can use the coupon for discounts on additional pitchers and replacement filters.

The coupon is also available on the Safe Water Program website <http://pittsburghpa.gov/safepgh2o/>

Please note that if you also requested a test kit, you will receive the kit in the mail.

If you have any questions, please call 311.
